José Costa

FRONT-END WEB DEVELOPER

ABOUT ME

I fell in love with technology the first time I booted a computer. During my studies I focused on web technologies as I realized the tremendous potential contained within them. I had to support my family so I became mostly self-taught and skipped college. I've been working in the field for 5 years now and I'm incredibly excited to see where things are moving to. The future is being built on the shoulders of web technologies!

WORK TIMELINE

FRONT-END WEB DEVELOPER/DESIGNER

BindTuning   01 Aug 2015 - Current

At BindTuning my role ranges from multi-platform front-end development to website graphics design and video editing. I work with a number of CMS including SharePoint and DNN. Lately I've been working on our branding tools for SharePoint using React and Typescript.

WEB DEVELOPER

67 Creative Studio   01 Aug 2014 - 01 Aug 2015

I started my career at 67 Creative Studio, a small start-up. There were only 2 developers including myself and we weren't picky with what projects we accepted so there was a great diversity of work. I built several websites, a mobile app for iOS and Android, managed an online classes portal, designed databases, etc. Everything we could get our hands on, **we would!**

EDUCATION

NEURO-LINGUISTIC PROGRAMMING

I Have the Power   01 March 2017 - 31 March 2017

NLP is a framework for personal development, communication and psychotherapy. This particular course was oriented towards interpersonal communication, time management, goal setting and productivity.

PROGRAMMING OF INFORMATION SYSTEMS

EP Infante   15 Sep 2011 - 15 July 2014

The scope of this course was broad so as to expose students to all the varieties of the field from network configuration to web development and promote a culture of self teaching through independent research. I was immediately drawn to web development and achieved the top score of 20/20 in the final project of the course, the second one in the **school**'s 20 year history.
MAIN SKILLS

Javascript
React
Vue

Angular

Typescript

jQuery
